**Subject:** Background Groundwater Quality Assessment deliverable

David,

As you know ARC is preparing the Background Groundwater Quality Assessment document for the Yerington site. The document is in final internal review. We anticipated that this document would be ready for submittal to EPA by June 30, however due to conflicts with team members availability we will need an extra day or two to complete the review and finalize this document. At this point we plan to submit this document on or before July 2.

Please let me know if you have any questions or would like to discuss further.

Thanks,

-jack
